A FALL CHANGED EVERYTHING
SAFELY YOU GAVE US PEACE OF MIND

“With SafelyYou in place, I no longer stayed up at night worrying. Mom was in a safe, supportive environment, and she was once again thriving.”

IT WAS A FALL THAT CHANGED EVERYTHING.

For thirty-eight years, my mom had lived in her home—the home she built with my dad, where she raised us and created so many memories.

But after Dad passed, everything became harder for her. Mowing the grass, shoveling snow, even simple tasks like carrying groceries inside became overwhelming. Each time I saw her, she seemed a little more tired, a little more fragile. But she refused to ask for help.

EACH TIME I SAW HER, SHE SEEMED A LITTLE MORE TIRED, A LITTLE MORE FRAGILE. BUT SHE REFUSED TO ASK FOR HELP.

I worried constantly. I knew she was trying to keep her independence, but I also knew she was struggling. The house was becoming too much for her, and no matter how much we tried to help, we couldn't be there every day.

And I'll never forget the mix of guilt and fear I felt, wondering if she would get hurt when I wasn't around.

But Mom—fiercely independent as she was—insisted she could manage. Then, one winter morning, she couldn't.

The call came on a cold day in January. Mom had gone to the mailbox, but the driveway was slick with ice. She slipped and broke her hip.

I FELT LIKE I'D FAILED HER—HOW COULD THIS HAPPEN? THE GUILT WAS OVERWHELMING.

After her surgery, the doctor told us she'd need weeks of rehab. I remember sitting in her hospital room, feeling completely lost.

Then, during rehab, we were introduced to Lourdes Senior Community. The care team there worked closely with us, helping us navigate what felt like an impossible situation.

After talking it over with Mom and taking a tour, we made the decision to move her to Mendelson Assisted Living, part of the Lourdes community.

TO MY SURPRISE—AND RELIEF—IT WAS THE BEST DECISION WE COULD HAVE MADE.

Mom absolutely thrived. The weight of managing the house was lifted, and with that, she found herself again. She made friends, joined activities, and still had her independence.

PROVEN FALL EXPERTISE 100K Clinically Reviewed Falls	ACCURATE & RELIABLE 99%+ Clinically Reviewed Falls
SIGNIFICANT COST SAVINGS 180% Reduction in Fall-Related ER Visits	BETTER OUTCOMES 40% Fewer Resident Falls

Year In Review Since installing the SafelyYou Alert System,
1:00 Minute Average Response Times
5:00 Minute Time On The Ground
60% Decrease ER Visits

BUT SOON AFTER, WE FACED A NEW CHALLENGE. MOM BEGAN TO FORGET THINGS.

At first, it was little details—repeating stories or forgetting what day it was. But soon, it became clear she needed more help than assisted living could provide.

I was terrified. How could I make the right decision for her again?

We toured Clausen Manor, Lourdes' memory care facility. From the moment I walked in, I knew this was where Mom needed to be. The staff understood her memory loss and knew exactly how to keep her safe while maintaining her dignity.

BUT WHAT SET MY MIND AT EASE THE MOST WAS SAFELYYOU—AN INNOVATIVE FALL DETECTION SYSTEM USING AI.

With SafelyYou, I knew that if she ever had a fall, the staff would be alerted immediately and could respond in under a minute. The system even helped the staff assess her environment to prevent future falls. I remember feeling, for the first time in a long time, a wave of relief.

WITH SAFELYYOU IN PLACE, I NO LONGER STAYED UP AT NIGHT WORRYING. MOM WAS IN A SAFE, SUPPORTIVE ENVIRONMENT, AND SHE WAS ONCE AGAIN THRIVING.

She loved participating in activities like baking and gardening club, surrounded by friends and compassionate caregivers. Clausen Manor had become her new home—a place where she was safe, happy, and cared for.

If you're facing the same difficult decisions I did, I urge you to schedule a tour of Clausen Manor. You don't have to do this alone—there's a place where your loved one can thrive.
